Ryan Hurd

Software Engineer · Internal Tools & User Experience

Warsaw, IN · (260) 580-0407 · rh25170@gmail.com · ryan.hurd.cc

SUMMARY

Software engineer who turns messy, spreadsheet-driven processes into tools people actually enjoy using. Four-plus years building Retool, SQL, and JavaScript applications for accounting, compliance, support, and operations teams. Designs around the user first: clear workflows, fewer clicks, consistent interfaces, and training that makes new tools stick. Comfortable across the full stack and in general IT, from front-end work to hardware and networking.

EXPERIENCE

Founder & Developer | Hurd Craft Co. LLC — Sep 2026 – Present

- Design and build full-stack websites and tools end to end, from interface and content workflow to API and database.
- Delivered client sites and portfolios: BBSystems.us, Ramona Bauch's portfolio, and Miretti Quality Construction.
- Built my own blog and portfolio platform on Next.js, Cloudflare Workers, a Go API, and MariaDB, including an admin experience for publishing content.
- Offer freelance Retool consulting, including performance audits and multipage redesigns of existing internal apps.

Software Engineer | Packaging Personified, Inc. — Oct 2025 – Oct 2026 · Warsaw, IN

- Built internal Retool applications for production, compliance, accounting, and operations teams using PostgreSQL, SQL, and JavaScript.
- Designed the Yield Report, bringing multiple data sources into one view of job performance, material usage, and efficiency trends.
- Replaced scattered spreadsheets with consolidated EPA reporting for Illinois and Michigan facilities, giving compliance staff a single maintainable workflow.
- Created a standardized Header Module and a scalable Location Swap app so every tool looks and behaves consistently.
- Cut Press WIP processing time by more than 40%.
- Trained managers, developers, owners, and end users on Retool workflows and best practices.

Software Engineer | Sweetwater Sound — May 2021 – Aug 2025 · Fort Wayne, IN

- Sole developer of Avalara's Exemption Certificate Management System, saving the tax team 160+ hours of manual validation per month.
- Integrated PayPal's Braintree (GraphQL) into the CRM to launch Gear Exchange, which passed $1M in sales within its first few months.
- Built the Price Management Platform for merchandising, tied to $4M in added revenue in under a month.
- Shipped a Turkey Handout app in 72 hours so the events team could serve 2,500 employees.
- Delivered daily-use tools across departments, from admin and SEO content tools to check-in scanners and kiosk management.
